Pune, India

EDUCATION

B.E. Chemical Engineering

AISSMS College of Engineering

Savitribai Phule Pune University

Expected Graduation: 2026.

HSC (12th Grade)

R. R. Shinde Junior College

2021 | 78.4%

CBSE (10th Grade)

Eon Gyanankur CBSE School

2019 | 83.4%

EXPERIENCE

Marcus Water Treatment Plant

India Ltd | Manufacturing Intern

- Managed water purification processes and quality testing (pH, turbidity, BOD, COD).
- Focused on process efficiency and environmental compliance within treatment units.

ACADEMIC PROJECTS

Green Hydrogen Production | PBL

Second Year

- Conducted a technical review of PEC Direct Solar Water Splitting to optimize water dissociation efficiency.
- Analysed critical parameters and reaction kinetics to assess the feasibility of commercial-scale sustainable energy.

LANGUAGES

- ENGLISH
- HINDI
- MARATHI

PROFESSIONAL SUMMARY

Analytical and detail-oriented Aspiring Software Developer with a background in engineering and comprehensive training in full-stack Java and JavaScript environments. Proven ability to design responsive frontends, construct secure backend systems, and integrate emerging LLM/AI technologies into web applications. Highly adaptable and eager to collaborate with forward-thinking development teams to build impactful software.

TECHNICAL SKILLS

- Programming Languages & Core:** Java (Core & Advanced), JavaScript (ES6+), TypeScript, HTML5, CSS3
- Frontend Frameworks & Libraries:** React.js, Angular, Redux, RxJS, Bootstrap, Tailwind CSS
- Backend & Frameworks:** Spring Boot, Spring MVC, Hibernate/JPA, RESTful APIs
- Databases & Storage:** SQL (MySQL), NoSQL (MongoDB), Data Modeling & Query Optimization
- Emerging Tech & AI:** Generative AI Integration, Prompt Engineering, OpenAI API / LLM Integration

PROJECTS

Personal Portfolio Website

Tech Stack: React.js, JavaScript, Tailwind CSS

- Developed a responsive personal portfolio website to showcase software engineering projects and technical skill sets.
- Designed a modular component structure in React.js to ensure easy maintenance and smooth user navigation across all screen sizes.

Employee Management System – JDBC Web Project Technologies: JSP, JDBC, HTML, Oracle SQL

- Developed login-based employee management system
- Implemented authentication and database integration
- Added employee data insertion and search functionality
- Used primary–foreign key relationships and session handling
-

Netflix Landing Page Clone

Tech Stack: HTML5, CSS3, Flexbox, CSS Grid

- Built a pixel-perfect, responsive Netflix landing page replica utilizing HTML5 and custom CSS3 styling.
- Leveraged Flexbox and CSS Grid to design responsive layouts, movie card rows, and custom UI components.
- Replicated signature brand UI features including hero gradient overlays, hover states, and dark-theme aesthetics. • Ensured cross-browser compatibility and optimized display performance across mobile and desktop devices.
